## Backpack-Style Battery Welder <WELZACK> Now on Sale

Denyo Co., Ltd.

Head Office: 2-8-5, Nihonbashi-horidomecho,  
Chuo-ku, Tokyo

Denyo will commence sales for its BDW-120BP backpack-style battery welder named WELZACK. Currently, this product is sold only to Japan's domestic market. Once, Denyo prepare the sales of the product for overseas, we will announce it immediately.

There is a growing demand for compact, lightweight, and easily portable battery welding machines, especially for short-term welding repair work at construction sites without a power supply, as they produce no noise or exhaust fumes.

This product weighs only 10 kg and is designed to be worn as a backpack, allowing easy movement by a single person on stairs or in tight spaces, reducing the burden on the operator. Additionally, it uses a highly versatile battery for power tools (HiKOKI brand), which can also be used with other power tools, thereby improving work efficiency. \*

One hundred units are planned to be sold in the first year.

Model	L x W x H	Weight	Remarks
BDW-120BP	200×320×440mm	10kg	For domestic market only.

\*Please use the designated HiKOKI brand battery and charger.
